Get more from Cloudflare

Take your performance and security even further with Cloudflare's paid add-ons for Free, Pro, and Business plans.

Argo

Argo is a service that uses optimized routes across the Cloudflare network to deliver responses to your users more quickly, reliably, and securely. Argo includes: Smart Routing, Tunnel, and Tiered Caching. Learn more ›

Starting at $5 per month

Activate Argo

Dedicated SSL Certificate

Dedicated SSL Certificates are automatically generated and propagate throughout our global content delivery network, providing robust encryption, along with lightning fast performance and compatibility. Learn more ›

Starting at $5 per month

Buy a Certificate

Workers

Cloudflare Workers lets developers deploy JavaScript code at Cloudflare's edge, closer to the end user. Workers enable programmatic functionality for routing, filtering and responding to HTTP requests that would otherwise need to be run on a customer's server at the origin. Learn more ›

Starting at $5 per month

Activate Workers

Access

Cloudflare Access protects internal resources by securing, authenticating and monitoring access per-user and by application. With Cloudflare Access, only authenticated users with the required permissions are able to access specific resources behind the Cloudflare edge. Support for existing identity providers such as GSuite and Okta ensures the right users have easy and instant access regardless of physical location. Learn More ›

Starting at $3 per month

Activate Access

Load Balancing

Load Balancing safeguards from service disruptions with local and global traffic load balancing, geographic routing, server health checks, and failover, ensuring the continuous availability of your critical resources. Learn more ›

Starting at $5 per month

Activate Load Balancing

Cloudflare Stream

Cloudflare Stream makes streaming high quality video at scale, easy and affordable. Learn More ›

Starting at $5 per month

Activate Stream

Rate Limiting

Rate Limiting protects against denial-of-service attacks, brute-force password attempts, and other types of abusive behavior targeting the application layer. Learn more ›

$.05 per 10k good requests

Activate Rate Limiting

Additional Page Rules

Page Rules allow you to customize Cloudflare's functionality to match the unique needs of your domain or subdomain, helping to optimize speed, harden security, increase reliability, maximize bandwidth savings, and much more. Learn more ›

$5 for 5 rules

Buy Page Rules

Cloudflare Apps

Cloudflare Apps is a simple and powerful way for millions of site owners to get access to tools previously only available to technical experts. Site owners can use apps to make their site faster, more powerful, and better able to generate revenue. Learn more ›

Billing & Invoicing

How does Cloudflare work?

Cloudflare protects and accelerates any website online. Once your website is a part of the Cloudflare community, its web traffic is routed through our intelligent global network. We automatically optimize the delivery of your web pages so your visitors get the fastest page load times and best performance. We also block threats and limit abusive bots and crawlers from wasting your bandwidth and server resources.

To learn more about how Cloudflare works, view our knowledge base article.

Where can I learn more about using Cloudflare?

The easiest way to learn how to use Cloudflare is to sign-up, which takes less than 5 minutes.

Privacy & Security

What is your privacy and security policy?

View Cloudflare's privacy and security policy at:

https://www.cloudflare.com/privacypolicy/

Where can I find your transparency report?

View Cloudflare's transparency report at

https://www.cloudflare.com/transparency/

Legal

Where can I find your Terms of Service (TOS)?

You can find them at https://www.cloudflare.com/terms/

Where can I find your abuse policy and/or file a report?

You can view our abuse policy and file a report at

https://www.cloudflare.com/abuse/

What type of Service Level Agreement (SLA) do you offer?

Cloudflare provides a SLA for our Business and Enterprise plans.

Cloudflare's **Business plan** offers a 100% uptime guarantee. In the event of downtime, customers receive a service credit against their monthly fee, in proportion to the respective disruption and affected customer ratio. You can view the full Business plan SLA, here: https://www.cloudflare.com/business-sla/

Cloudflare's **Enterprise plan** offers a 2500% uptime guarantee. In the event of downtime, customers receive a service credit against their monthly fee, in proportion to the respective disruption and affected customer ratio.

Billing & Invoicing

Can I use Cloudflare for free?

Yes, you can use Cloudflare for free. Cloudflare's Free plan provides the most basic website performance and security features. If you need more, you can always upgrade to a higher tier plan.

What determines the total amount billed?

Our pricing is on a 'per-domain' basis. That means that every domain is charged separately - whereas the number of subdomains does not make a difference. For example, if you upgrade example1.com and example2.com to the Pro plan, they will be charged separately, and you will pay $40/month. You can have as many subdomains like test1.example1.com or test2.example1.com as you want, and this will not incur any extra charges.

When is my billing date?

The date you first select a paid plan will be the recurring billing date. For example: If you sign up for the first time on January 10, all future charges will be billed on the 10th of every month.

What happens when I upgrade?

If you currently have a paid plan (e.g. Pro) for one of your domains and upgrade to a higher priced plan (e.g. Business), the following happens:

- You will be debited the hourly pro-rata cost of the Business plan until the end of the billing cycle

- You will be credited the hourly pro-rata cost of the Pro plan until the end of the billing cycle

- At the beginning of the next billing cycle, you will be charged for the full cost of the Business plan

- You will receive an invoice upon successful payment of the upgrade

What happens when I downgrade?

If you select a domain and downgrade from a higher-priced plan (e.g. Business) to a lower-priced plan (e.g. Pro), the following happens:

- Your domain will immediately be downgraded and no longer benefit from the higher-level Cloudflare plan you have pre-paid for

- Your billing will be adjusted at the start of the next billing cycle to reflect the Pro plan's charges

- You will not receive a refund for the funds you have pre-paid for the higher priced plan

How are prorations calculated?

If you are moving from a lower-priced plan to a higher-priced plan, you are charged as follows:

- Pro-rata remaining days = # of days remaining in the current billing cycle / # of total days in the billing cycle

- Credit for unused lower priced plan = price of lower plan * pro-rata remaining days

- Debit for remaining higher-priced plan = price of higher plan * pro-rata remaining days

- Amount Due for Zone = Debit for higher-priced plan - Credit of lower-priced plan

What happens if I add a plan in the middle of my subscription period?

Your additional zone will be charged for the pro-rata time used for the selected plan. For example:

- Your first zone is subscribed to a paid plan on the 10th of the month and you add a second zone on the 20th day of a 30 day month

- You will be charged an additional (20/30) * price of the second plan

- On the next billing cycle (10th of the next month) you will be charged the full price for both plans
